

bt-sonic™ by Bio-Therapeutic

The **bt-sonic™ Facial Cleansing System** is a forward thinking professional grade sonic silicone facial cleansing brush. Battery operated, water resistant, light and agile, this remarkable new technology can be used in any environment. Designed to be used twice daily with professional cleansing and exfoliation products, the bt-sonic™ helps remove impurities and congestion that would otherwise remain on the skin. The result is smoother, beautiful, healthy looking skin that is perfectly prepared for professional product application.

anti-microbial silicone head

- Cleansing head made from our own BT Azul Silicone, which utilizes silver ion technology for comprehensive anti-bacterial and anti-microbial properties
- Durable and long lasting

sonic motor

- The motor is strategically located at the base of the neck allowing maximum sonic activity to be transferred through the Azul Silicone bristles
- The sonic motor is sealed in silicone, protecting it from moisture

unique bristles

- Triangular Dynamic Cleansing head allows for gentle and complete access to every part of the face including the hard to reach areas near the nose and eyes
- Provides great coverage, the entire face can be cleansed in 2 minutes

water resistant

- May be used in any environment
- An external and internal water resistant silicone sealing system keeps the internal workings and battery compartment dry

light and agile

- The sleek shape of the bt-sonic™ is agile and smart
- Light weight and compact, it can be used quickly and effectively

efficient

- Powered by 2 AAA batteries

guaranteed

- One year manufacturer limited warranty
