

PRODUCT	TYPE
Treatment Table	MLX iDome / MLX i³Dome

Description:
MLX spa table construction with adjustable dome // Gharieni FIR-technology // Height-adjustable (only Electric version) // Dome electrically adjustable (only Electric version - Static version pneumatically adjustable with 2 gas lifts) // inclinable lying surface // For anti-aging and detox // International voltages available // Storage space // including extension for lying surface, headrest, neck support, two covers blankets for dome and two blankets for lying surface // optional with Plasma Light Therapy (= MLX i³Dome)

Height of the bed surface (Electric version): 53-83 cm // Height of the bed surface (Static version): 53 cm
Length: 225 cm (245 cm with extension) // Total width: 90 cm // Width upholstery: 70 cm
Lifting capacity: 300 kg (Electric version) // Load capacity: 350 kg

Optional extras (prices on request)

- Plasma Light Therapy (PLT)
 - LED Spa Ambience Light
 - Upholstery in special color*
 - Wood décor in special color
 - Metal components in special color
- *Color for dome, bed surface, headrest and neck support from Ferrari Stamskin range, only one color selectable*

Standard colors included into the list price:

Upholstery:	Stamskin Ferrari White
Metal components:	White RAL 9016, titanium RAL 9007, black-brown RAL 8022 or RAL ELOX (anodized)
Wooden décor:	White, Wenge, Gris Céramique, Erable Gris C or Beton

MLX i3Dome - The Ultimate Detox Booster
The Gharieni Triple Detox Therapy „MLX i3Dome“ is the new generation of detox treatments. Combining Far Infrared technology with Plasma and Light, this spa table offers 3 ultra-effective detox treatment methods in one.

Charge your batteries and detox
While the Gharieni FIR-technology stimulates the metabolism and the perspiration of the body with long-wave infrared rays through the MLX iDome, the additional Plasma- and Light-Therapy device (PLT) at the head section provides visible skin rejuvenation and detoxification already after the first use. Using the three therapies in such a well thought-out combination is much more effective, as all three therapies support and multiply the results of all individual treatments.

No therapist needed
The Gharieni MLX i3Dome concept works as a stand-alone therapy, where no therapists is needed. After the client is positioned on the MLX iDome and the PLT device, no hands are necessary to support the Gharieni MLX i3Dome detox therapy.

Gharieni Group certification according to ISO13485:
CE marked
Made in Germany
TÜV certification

3 years full warranty (on all components), 5 years on actuators, 10 years on metal frames

FIR-Therapy

What is Far Infrared?

First discovered by scientist Sir William Herschel in 1800, Far Infrared Rays (FIR) are invisible and present in sunlight. Initial research led to the discovery that not only were there already known visible rays – red, orange, yellow, green, blue and violet – but also invisible ones later named Infrared. FIR are the healthy rays contained in sunlight that are responsible for photosynthesis, the process used by plants to produce energy and without which, there would be no life on earth. Approximately 80% of solar energy is made up of FIR and 60% is between the range of 10-20 microns. Far Infrared Rays are invisible wavelengths of light that are longer than that of visible light. Safe and beneficial, FIR is a band of energy in the complete electromagnetic spectrum that has been used effectively for a very long time to treat/ease physical discomforts and illnesses. All living organisms are subjected to the natural electromagnetic radiation reaching the earth from the sun. When these invisible wavelengths of light are absorbed by the cells of the body, it is felt as heat and provides a warming and cocooning sensation. Infrared saunas are only one of the avenues (and perhaps the oldest) to deliver the radiation in a controlled environment and within a convenient treatment time. With the development of better technology to deliver pure Far Infrared Radiation (FIR), the recognition of its benefits from its effects have significantly grown in the past few years and are now included in wellness protocols throughout the world.

Plasma Therapy

Plasma for problem skin, anti-aging and revitalization

Plasma Therapy is an innovative method for cosmetic treatments. During the application, clients are exposed to the energy of oxygen (O2) in the form of applied electrically negatively charged ions

Benefits include:

- Visible skin rejuvenation already after a few applications
- Maintenance of skin health
- Visible improvement of problem skin
- Increase of vitality & suppleness
- Positive support of the metabolism in the entire organism

Based on findings of quantum physics, Plasma Therapy are the negative ions collected from the ambient air and then directed into the specially coated PLT device where it combines with Light therapy. Ions penetrate through the skin to stimulate cell metabolism while there is simultaneous inhalation through mouth and nose thereby providing positive benefits for the whole body including organs and muscles.

The more the better.

Our organism needs electricity from the negative ions released by oxygen molecule.

— Negative ions* + Positive ions*

*Number of positive and negative ions per cm³

Light Therapy

Light therapy: scientifically proven and effective
Light treatment has been known for a long time and has been successfully used in treatments for decades.
The effect of the colored light is reinforced by the negative ions.

Applications of red light therapy:

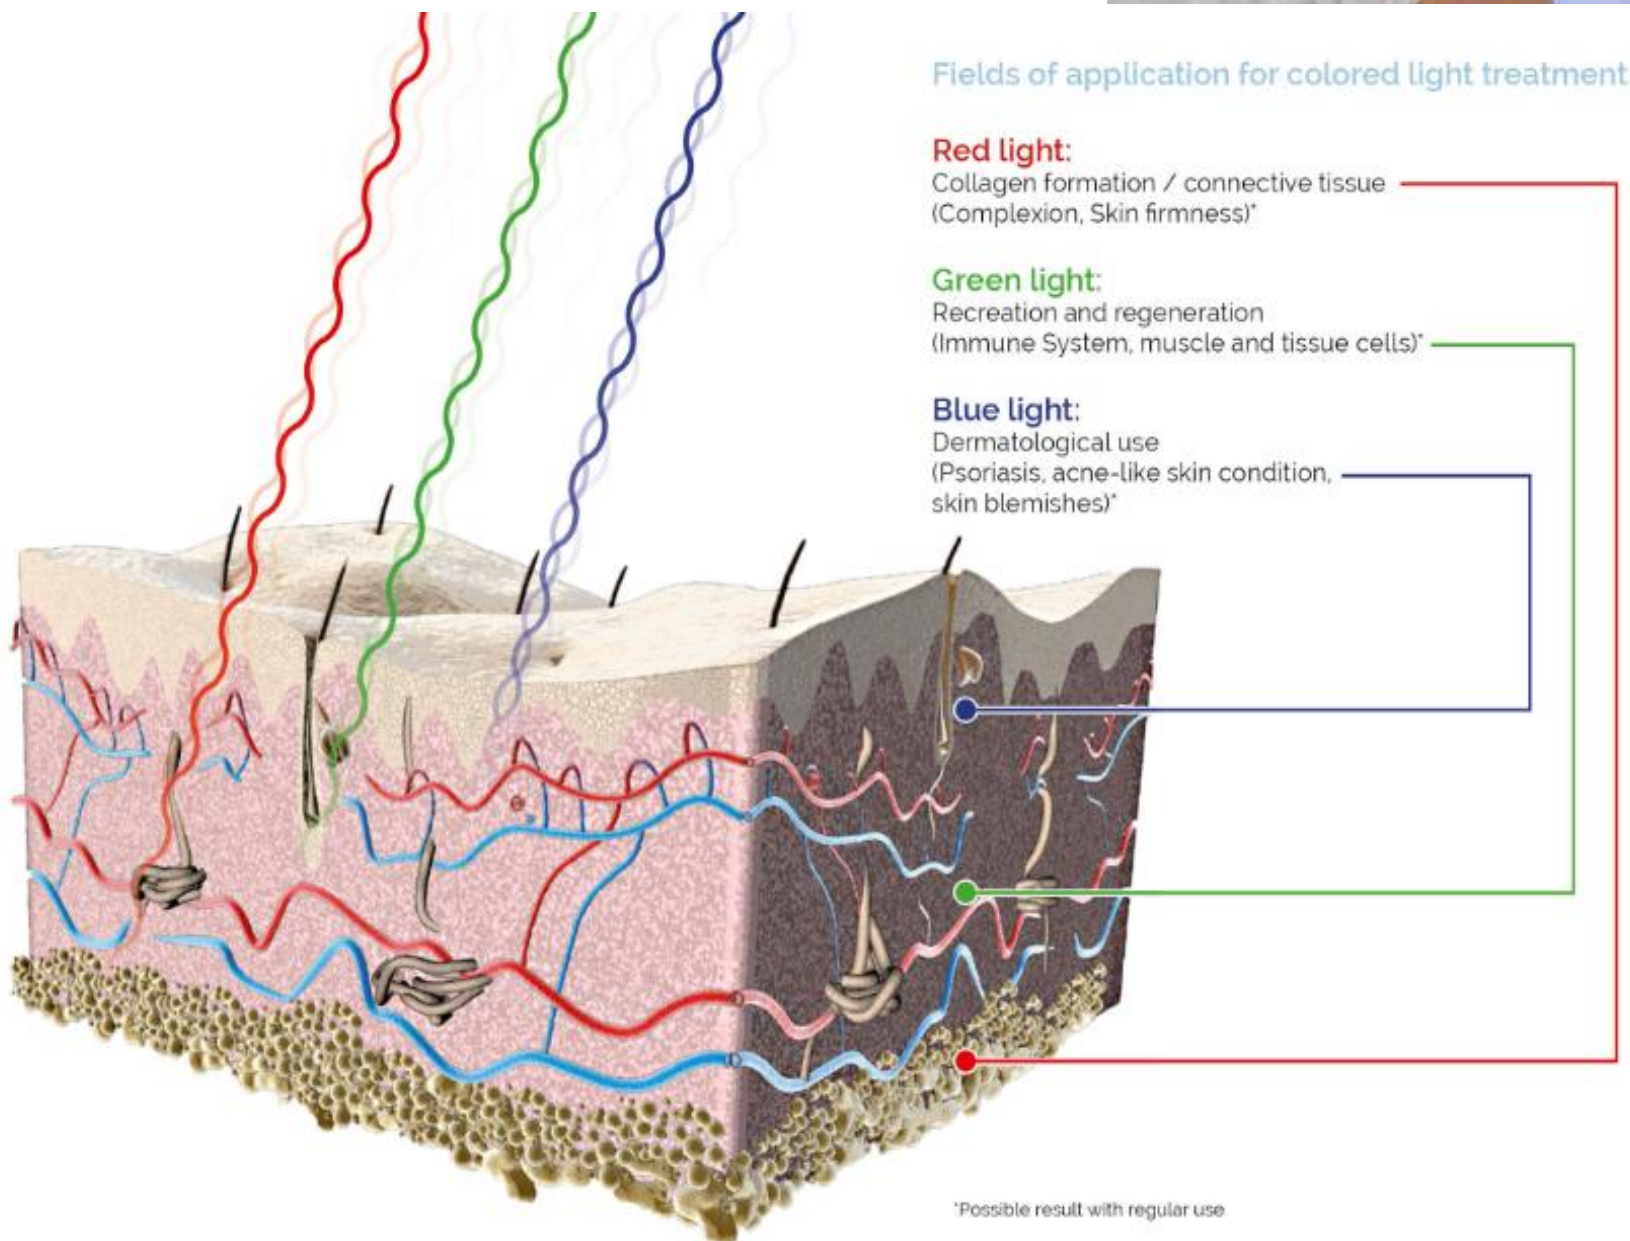

- Increase in collagen formation / collagen synthesis
- Skin repair & renewal (anti-aging)
- Prevents and reduces scar tissue
- Supports wound healing
- Stimulates ATP in cells and increases cellular reproduction

Applications of green light therapy:

- Detoxification
- Antibacterial properties
- Relieves stress
- Strengthens immune system
- Builds muscle and bone
- As aphrodisiac and sexual tonic

Applications of blue light therapy:

- Eczema / psoriasis
- Acne
- Antiseptic and antibacterial
- Anti-inflammatory and astringent effects
- Anti sebum production
- Relieves anxiety
- Strengthens the immune system
