

SAFETY DATA SHEET

SECTION 1. IDENTIFICATION OF THE MIXTURE AND COMPANY

- 1.1 Essentially Massage Wax Sport
- 1.1.1 Product Reference ES-MWS
- 1.2 The mixture is used as a Personal Care Product.
- 1.3 **Manufacturer/Distributor**:

Purple Flame Aromatherapy Ltd St John's Spinney Gun Hill New Arley Warwickshire CV7 8HA

1.4 Emergency Telephone:

+44 (0) 1676 542542

SECTION 2: HAZARD IDENTIFICATION

2.1 Classification of the substance or mixture

Classification (Regulation (EC) No 1272/2008)

Not classified

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictogram

None

Signal Word

None

Hazard statement

None

Precautionary Statements

None

2.3 Other hazards

EUH208 Contains : Lavandula angustifolia Oil, Salvia sclarea Oil, Origanum majorana Leaf Oil, Santalum austrocaledonicum Wood Oil May produce an allergic reaction

Page 1 of 8

Essentially Massage Wax Sport Ref : ES-MWS
Issue 1 Reason : New

12/12/2016

SECTION 3: COMPOSTION / INFORMATION ON INGREDIENTS

3.1 Substances not applicable

3.2 Mixtures

Ingredient name	CAS	%	Classification	Hazard
	Number	(w/w)		phrases
Lavandula angustifolia Oil	8000-28-0	0.57	Aspiration Toxicity (oral) Category 1	H304
			Skin Irritation Category 2	H315
			Skin Sensitiser Category 1	H317
			Aquatic Chronic Category 3	H412
Salvia sclarea Oil	8016-63-5	0.57	Flammable Liquid Category 3	H226
			Skin Irritation Category 2	H315
			Skin Sensitiser Category 1	H317
			Aquatic Chronic Category 3	H412
Origanum majorana Leaf	84082-58-6	0.57	Flammable Liquid Category 3	H226
Oil			Acute Toxicity (oral) Category 4	H302
			Skin Irritation Category 2	H315
			Skin Sensitiser Category 1	H317
			Eye Irritation Category 2	H319
			Aquatic Chronic Category 2	H411
Santalum	91845-48-6	0.27	Skin Irritation Category 2	H315
austrocaledonicum Oil			Skin Sensitiser Category 1	H317
			Eye Irritation Category 2	H319
			STOT SE 3,	H335

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: FIRST AID MEASURES

4.1 First Aid Instructions

General: If symptoms persist, call a Doctor

Eyes: If this product comes in contact with eyes: Wash out immediately with water. If irritation continues seek medical attention. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.

Skin : If skin or hair contact occurs: Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.

Ingestion: Immediately give a glass of water. First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

Inhalation : If fumes, aerosols or combustion products are inhaled remove from contaminated area. Other measures are usually unnecessary..

4.2 Symptoms and effects, both acute and delayed

Inhaled: The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified by EC Directives). Nevertheless, good hygiene practice requires

Page 2 of 8

Essentially Massage Wax Sport
Issue 1 Ref: ES-MWS
Reason: New 12/12/2016

that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

Ingestion: Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern.

Skin Contact: The material may produce skin irritation following contact (as classified by EC Directives). Good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting.

Eye: Although the liquid is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may produce transient discomfort characterised by tearing or conjunctival redness (as with windburn).

Chronic: Long-term exposure to the product is not thought to produce chronic effects adverse to health (as classified by EC Directives); nevertheless exposure by all routes should be minimised as a matter of course.

SECTION 5: FIRE FIGHTING MEASURES

5.1 Extinguishing Media

Suitable: Use water spray, alcohol resistant foam, dry chemical or carbon dioxide.

Keep containers and surroundings cool with water spray.

Unsuitable: No full water jet.

5.2 Special Hazards

Do not use a solid water stream as it may scatter and spread fire.

If heated to decomposition may release COx and complex hydrocarbons.

5.3 Advice to firefighters

Special protective equipment

for firefighters.

In the event of fire, wear self-contained breathing apparatus.

Further information Non combustible. Not considered a significant fire risk,

however containers may burn. Cool endangered containers or

product with water spray jet.

In the event of fire do not breathe fumes

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal Precautions :

Glasses: Chemical goggles.:

Gloves: When handling larger quantities

Respirator Type A-P Filter of sufficient capacity

6.2 Environmental Precautions

<u>Environmental Precautions</u>: Prevent the material from entering drains or water courses. Advise authorities if spillage has entered water course or sewer.

Minor Spills: Clean up all spills immediately. Avoid breathing vapours and contact with skin and eyes. Control personal contact with the substance, by using protective equipment. Contain

Page 3 of 8

Essentially Massage Wax Sport Ref: ES-MWS

Issue 1 Reason: New

and absorb spill with sand, earth, inert material or vermiculite. Wipe up. Place in a suitable, labelled container for waste disposal.

Major Spills: Clear area of personnel and move upwind. Alert Fire Brigade and tell them location and nature of hazard. Control personal contact with the substance, by using protective equipment. Prevent spillage from entering drains, sewers or water courses. Recover product wherever possible. Put residues in labelled containers for disposal. If contamination of drains or waterways occurs, advise emergency services.

6.3 Methods and materials for containment and cleaning up

<u>Spill response</u>: Contain and absorb using earth, sand or other inert material. Transfer into suitable containers for recovery or disposal.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

Limit all unnecessary personal contact.

Wear protective clothing when risk of exposure occurs.

Use in a well-ventilated area.

Avoid contact with incompatible materials.

When handling, **DO NOT** eat, drink or smoke.

Keep containers securely sealed when not in use.

Avoid physical damage to containers.

Always wash hands with soap and water after handling.

Work clothes should be laundered separately.

Use good occupational work practice.

Observe manufacturer's storage and handling recommendations contained within this MSDS

7.2 Conditions for safe storage

Store in tightly closed plastic, plastic lined or stainless steel containers at temperature between 10 - 30°C.

Do not store close to strong oxidising agents which could aggravate any fire situation.

When handling raw bulk wear safety glasses, PVC gauntlets and protective overalls.

Keep out of the reach of children.

Storage area should be dry, well ventilated and cool.

7.3 Specific end use

Product is designed as a Personal Care Product for home use and is safe when used in accordance with manufacturer's instructions.

SECTION 8: CONTROL PARAMETERS

8.1 Control Parameters

Components with workplace control parameters:

None

8.2 Exposure Controls

8.2.1 Appropriate engineering controls

Ventilation: Keep area well ventilated.

8.2.2 Personal Protection:

Page 4 of 8

Essentially Massage Wax Sport Ref: ES-MWS
Issue 1 Reason: New 12/12/2016

Eye Protection : Safety glasses with side shields Chemical goggles.

Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lens or restrictions on use, should be created for each workplace or task. This should include a review of lens absorption and adsorption for the class of chemicals in use and an account of injury experience. Medical and first-aid personnel should be trained in their removal and suitable equipment should be readily available. In the event of chemical exposure, begin eye irrigation immediately and remove contact lens as soon as practicable. Lens should be removed at the first signs of eye redness or irritation - lens should be removed in a clean environment only after workers have washed hands thoroughly.

Hand Protection: Wear general protective gloves, eg. light weight rubber gloves. The selection of the suitable gloves does not only depend on the material, but also on further marks of quality which vary from manufacturer to manufacturer. Where the chemical is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application. The exact break through time for substances has to be obtained from the manufacturer of the protective gloves and has to be observed when making a final choice.

Suitability and durability of glove type is dependent on usage. Important factors in the selection of gloves include: frequency and duration of contact, chemical resistance of glove material, glove thickness and dexterity Select gloves tested to a relevant standard (e.g. Europe EN 374, US F739, AS/NZS 2161.1 or national equivalent). When prolonged or frequently repeated contact may occur, a glove with a protection class of 5 or higher (breakthrough time greater than 240 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is recommended. When only brief contact is expected, a glove with a protection class of 3 or higher (breakthrough time greater than 60 minutes according to EN 374, AS/NZS 2161.10.1 or national equivalent) is recommended. Contaminated gloves should be replaced. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly

Respiratory Protection: Respiratory protection if there is a risk of exposure to high vapour concentrations.

Body protection: No special equipment needed when handling small quantities.

OTHERWISE: Overalls. Barrier cream. Eyewash unit.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Wax

Colour: As standard Odour: characteristic рН Not Applicable **Melting Point** Not Applicable **Boiling Point** Not Applicable Flammability Non-flammable Flash Point Not Applicable Solubility Insoluble in water Specific Gravity Not determined Viscosity: Not determined

Page 5 of 8

SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity

no data available

10.2 Chemical stability

Stable under normal conditions

10.3 Possibility of hazardous reactions

No dangerous reaction known under conditions of normal use.

10.4 Conditions to avoid

no data available

10.5 Incompatible materials

no data available

10.6 Hazardous decomposition products

no data available

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Acute Toxicity

Not determined

Skin corrosion/irritation

irritant

Serious eye damage/eye irritation

irritant

Respiratory or skin sensitisation

Not determined

Germ cell mutagenicity

no data available

Carcinogenicity

no data available

Reproductive toxicity

No data available

Specific target organ toxicity - single exposure

Eyes: Causes eye irritation. Signs/symptoms may include redness,

swelling, pain, tearing and blurred or hazy vision.

Skin: Causes skin irritation. Signs/symptoms may include redness, itching, heat,

swelling, pain

Specific target organ toxicity - repeat exposure

No data available

SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity

Toxicity to fish mortality LC50 - Salmo gairdneri - not determined

Method OECD Test Guideline 203

Toxicity to Daphnia Immobilisation EC50 - Daphnia magna (Water flea) - not determined

and other aquatic invertebrates

Page 6 of 8

Essentially Massage Wax Sport Ref : ES-MWS

12.2 Persistence and degradability

Biodegradability Biotic/Aerobic - not determined.

12.3 Bioaccumalative potential

No data available

12.4 Mobility in soil

No data available

12.5 Results of PBT and vPvB assessment

No data available

12.6 Other adverse effects

No data available

BiochemicalOxygen

not determined

Demand ()BOD)

Chemical Oxygen Demand (COD) not determined

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Dispose of to a licensed disposal company in accordance with local regulations.

Disposal Method: When disposing of waste or surplus amount avoid contact with eyes, mouth & skin. Do not mix waste with other materials.

Do not dispose of bulk quantities directly into drains. Single units can be disposed of with other household refuse.

13.2 Contaminated packaging

Dispose of as unused product.

Refer to Section 8.2.2 for details of Personal Protective Equipment

SECTION 14: TRANSPORT INFORMATION

14.1 UN Number

None

14.2 Proper shipping name

None

14.3 Transport hazard class

None

14.4 Packing group

None

14.5 Environmental hazard

Harmful to aquatic life with long-lasting effects

14.6 Special precautions for user

no data available

SECTION 15: REGULATORY INFORMATION

This safety datasheet complies with the requirements of Regulation (EC) No. 1272/2008

Page 7 of 8

Essentially Massage Wax Sport Ref : ES-MWS

15.1 Safety, health and environmental regulations specific for the substance or mixture no data available

15.2 Chemical Safety Assessment

no data available

SECTION 16: OTHER INFORMATION

Pictogram

None

Signal Word

None

Full text of H-statements referred to under sections 2 and 3:

H226 Flammable liquid and vapour

H302 Harmful if swallowed.

H304 May be fatal if swallowed and enters airways.

H315 Causes skin irritation

H317 May cause an allergic skin reaction

H319 Causes serious eye irritation

H335 May cause respiratory irritation.

H411 Toxic to aquatic life with long-lasting effects

H412 Harmful to aquatic life with long-lasting effects

Supplemental Hazard

Statements

EUH208 Contains: Lavandula angustifolia Oil, Salvia sclarea Oil, Origanum majorana Leaf Oil, Santalum austrocaledonicum Wood Oil May produce an allergic reaction

Reference No: ES-MWS
